

I suffered multiple fractures and had to wear a shell like a turtle around my chest for many months, as a result of injuries in a single vehicle car accident that ended my career in the oil patch in Alberta and ended my working life. While I was in hospital, a friend found injury lawyers Hanson Associates in Calgary to help me. They helped me apply for and get started the disability insurance that I needed, to keep my household going and did a great job in getting me a settlement that I could pay off my mortgage with and live on, in spite of the defence trying to make me partly responsible for my injury and getting a medical expert to try to cast doubt on the extent of my injuries and disability. These injury lawyers in Calgary arranged for the questioning in the law suit to be in my home town in Newfoundland, so that I did not have to fly to Calgary for that, and always had a solution for every problem that arose. Throughout, they were professional and friendly and I will forever be grateful for their help.
