

I studied hard for years to get my education and qualification as a Veterinarian and I worked very hard at starting and growing my own successful practice.

Mr. Hanson has been our lawyer for more than 25 years. I have always found his advice to be thoughtful, sensible and helpful. He drafts excellent business documents and ensures that my business transactions complete flawlessly.

Being financially comfortable, with children of university age, when I was starting a new clinic, we wanted a corporate and estate plan that would provide for them as needed, while we retained control of our businesses and their assets. We wanted the flexibility of being able to choose what benefit to provide to each child and at what time, while protecting the assets from the kinds of losses that can occur if people receive them before they are adequately, mature, experienced and responsible. We wanted to protect our equity while retaining the option to have increases in value go to our children , as we chose to distribute in the future, and be subject to tax in their hands.

Mr. Hanson has been a lawyer for more than 30 years has adult children. He identifies with our concerns.

The Family Trust and corporate planning that we did with him were precisely what we needed.
